Trusting the People. BY LEO.

In his late New York speech Col. Roosevelt charged the Pres ident with a want of confidence in the people; to use his own words, "Taft does not trust the people." Is this true? It depends on the point of view. President Taft trusts the people just as all former chief magis trates, including Roosevelt himself, trusted the people.

The contention between Taft and Roosevelt is about the proper mode of popular government; the President believing and maintaining the theory of representative government, and Roosevelt pleading for a direct government -a government by a majority of voters. Mr. Roosevelt is not in favor of abolishing representative government, but would supplement the same with direct rule of the people, while President Taft believes in the government of the people by means of their elected representatives.

When Roosevelt asserted that Taft did not trust the people he simply meant to say that President Taft has no faith in the initiative, referendum and recall: that is, he does not believe as ex-President Roosevelt does.

Is this mistrusting the people? If so, then not one of our fo chief magistrates from Washington down trusted the people. Not one of them had any idea of the new fangled notions of the present day. Did Washington and Lincoln trust the people? Yes, and precisely as Taft does -just as Mr. Roosevelt did when in office.

Ours is a representative government-a government of the people by means of chosen officers and law-makers—the only practical popular government of a nation the size of ours.

When the present constitution was framed it was referred to the people of the thirteen states for approval. The people ratified the document and it stands as a bond of union between all the people. It stands to reason, therefore, that the government must be carried on in harmony with the letter and spirit of the national constitution. That is President Taft's plea. He would have all people respect the constitution as the fundamental law of the nation. Of course, the constitution can be amended. has been, and may be again, but the way to amend is pointed out hight. in the instrument itself. So far, then, the President is right. He trusts the people, just the same as all former chief magistrates did, including Col. Roosevelt himself.

What more does Col. Roosevelt want? He thinks the people should have the power to act upon legislation directly; that is, by a popular majority in matters involving constitutional questions. If, for instance, the Supreme court of a state decides anything unconstitutional, then the plain people by an election est.

may set aside the decisions of the judges as null and void.

Hitherto we have acted on the belief that expert lawyer-jurists of the Supreme court are better able to interpret the organic law than "the plain people"; but Roosevelt wants the plain people to have a chance to correct the judges. That would be democracy with a vengeance.

government, such as we have enjoyed from the beginning under George Washington, and Col. Roosevelt stands for direct democratic government. The convention in June is to decide between the two; and we believe of pleasure. that representative government and Taft will come out victori- Columbus yesterday and R. C.

The question is not shall the people rule, but shall the rule of the people be direct or by means of chosen representatives? Popular government is not at stake as Col. Roosevelt seems to think.

The Men Who Succeed as heads of large enterprises are men of great energy. Success, today, demands health. To ai is to fail. It's utter folly for a man to endure a weak, run-down, half-alive condition when Electric Bitters will put him right on his feet in short order. "Four bottles did me more real good than any other medicine I ever took," writes Chas. B. Allen, suffering with rheumatism, liver trouble, stomach disorders and deranged kidneys, I am again, thanks to Electric Bitters, sound and well." Try them. Only 50 cents at Wm. Kipp's Sons Co.

THE "RECALL" OF A DECISION.

Insists That Government Be Run on Sound Business Basis.

STRONG PROGRESSIVE POLICY

His Personal Efforts to Reduce Cost of Efficient Service Bring Results-Work Done by the Economy and Efficiency Commission.

President Taft, more than any of is predecessors in the White House, has given strict attention to placing the government upon a business basis as regards its receipts and expenditures. Economy and efficiency became one of the cardinal policies of his administration as soon as he entered upon the presidency and it was well for the country that this was so, for his administration inherited a deficit in the treasury of \$58,000,000, which has now been transformed to a surplus of \$30,000,000. The average citizen and taxpayer will be interested in this fact because the problem which confronted the president at the outset, although upon a gigantic scale, was similar to that of the ordinary shopkeeper or business man, farmer or wage-earner or even housewife, who is called upon to make "both ends

meet" either in business or in the By law the secretary of the treasury is called upon every year to submit to congress in December the "estimates" of governmental expenditures for the next fiscal year beginning the following July 1. As congress has to provide the money to run the government the money has to be appropriated for specific purposes before it can be expended and if this were not done before the beginning of the fiscal year the machinery of government would unless emergency

could be made.

How Estimates Are Made. The "estimates" are prepared by the executive departments of which each member of the cabinet is head. The cabinet officers get the "estimates" in their respective departments from their chiefs of bureaus and then combine them as the "esti mates" for the department. The "estimates" from all departments are then sent to the secretary of the treasury to be submitted to congress. and they then become the "estimates" for the cost of running the entire government during the next fiscal year Upon these figures congress makes the greater part of its annual appropriations amounting to more than one billion dollars annually.

Until 1908 a more or less lax methods of making estimates for the annual appropriations obtained throughout the government. The figures sent to congress each year, instead of showing indications of a careful "pruning" all along the line, showed there was a disposition among the departments to vie with each other in getting as New Mexico large appropriations as possible without considering whether or not Philippines the money demanded could be advantageously expended during the coming year. There was no standardization of supplies and the various departments were paying varying prices for the same article. In other words, business methods did not obtain in the government activities and there was no conservation of the resources of the treasury department.

What President Taft Did. As soon as President Taft took office this system ceased. At the outset President Taft impressed upon his cabinet officials the absolute necessity of economy and efficiency in their departments. He admonished them that not a dollar beyond what was necessary to run the government efficiently n the departments, including a fair pargin for progress which is a part of

efficiency in the program of President Taft, should be asked of congress. The effect was immediate. Every department began work at once to investigate its own expenditures and to devise ways and means of curtailing extravagance. The result was that congress received the lowest estimates it had seen in years. This was followed by a reduction in appropriations to correspond, always allowing for the natural growth of the government's activities, which represented a net saving to the taxpayers of the coun-

satisfied that all had been done that could be done. He realized that the departments of the government, like individuals, are naturally prone to be proud of their own achievements and by reason of their familiarity with their own endeavors, often insisted that their work was more than the work of the other departments, relatively speaking. In order to correct that evil he asked congress to give him \$100,000 for a commission of disinterested experts to investigate and report on the business of the government with a view to further economy and efficiency. Thus came into official being the commission of that

This commission, among other duties, was directed to prepare the receipts and expenditures of the government on a "budget" basis, which is the system followed by practically all the leading nations of the world except the United States. Under this system it is possible for the humblest citizen to analyze the finances of the government at any time and to lay his finger upon the responsible political party in the event of extravagance or of stinginess. The system under which appropriations for the government of the United States have been made has even defied the experts in their endeavors to unravel the tangled skeins of expenditures, so that it is a fair statement to say that no citizen of this country up to the present time has ever thoroughly understood where his taxes were expended.

The economy and efficiency commission has already saved to the taxpayers of the country more than \$3,-000,000 annually by its suggestions and by the time it has completed its work it is believed ten times this sum can be saved annually to the taxpayers. In the matter of railroad fare for government officials alone, it has found that \$12,000,000 was expended in a single year at the highest prevailing railroad rates. At least a fourth of this can be saved by the application of business methods such as President Taft has applied and has insisted shall be applied to all the departments of the government.

TAFT DELEGATES

President Taft had on March 15, 1912, the following instructed dele gates to the Republican national convention, which will meet at Chicago on June 19, 1912, as follows: Alabama District of Columbia Florida lowa Indiana Michigan Missouri

Oklahoma South Carolina

No Brass Band.

Necessary for a choice........539

Brass bands and megaphones have not been needed to herald the accomplishments of the administration of President Taft. All of the great achievements for which the president is directly responsible have been accomplished quietly and without the slightest semblance of noise or bluster. The voters of the country dis

played their faith in President Taft and his policies in 1908, and they are prepared to again register their allegiance to his cause.
